Activity 4 Case Study

Test a GRI claim and build the content index

Real use case: DBS Sustainability Report 2025

Situation

Determine in-accordance or with-reference status and create a working GRI content index. The learner works only from the cited public report and the controlled teaching dataset; company-specific numbers must not be invented.

Evidence provided

GRI 1 nine-requirement checklist, DBS report and index template

Discussion and analysis tasks

1. Test the report against all nine requirements.

2. Record evidence location for each result.

3. Choose the defensible statement of use.

4. Create content-index entries for GRI 2 and GRI 3.

5. Log omissions with reason, explanation and action date.

Deliverable and acceptance

Claim-readiness checklist and content-index extract

The claim wording matches the checklist; every index row resolves to an exact location or valid omission.
