Activity 5 Case Study

Determine material topics with GRI 3

Real use case: CDL 2025 double materiality process

Situation

Identify, assess and prioritise impacts using the GRI 3 significance process. The learner works only from the cited public report and the controlled teaching dataset; company-specific numbers must not be invented.

Evidence provided

CDL topic list, impact register and severity worksheet

Discussion and analysis tasks

1. Review organisational context and business relationships.

2. Write impact statements using cause-pathway-subject-consequence.

3. Score scale, scope and irremediable character.

4. Assess likelihood only for potential impacts.

5. Apply the threshold and document governance validation.

Deliverable and acceptance

Prioritised material-topic register and decision log

High-severity human-rights impacts are not screened out by low likelihood; overrides carry approver and rationale.
