Activity 8 Case Study

Build social disclosure controls

Real use case: Regional logistics workforce

Situation

Prepare employment, safety, diversity and privacy metrics without denominator or confidentiality errors. The learner works only from the cited public report and the controlled teaching dataset; company-specific numbers must not be invented.

Evidence provided

HR roster, hours, incident, training and complaint datasets

Discussion and analysis tasks

1. Define employee and worker populations.

2. Calculate hire, turnover and injury rates.

3. Reconcile training coverage to eligible population.

4. Aggregate diversity categories and suppress small cells.

5. Classify complaints as inquiry, allegation or substantiated case.

Deliverable and acceptance

Social KPI tables and privacy review record

Numerators and denominators use the same population; no small cell reveals an individual.
