Activity 9 Case Study

Draft and visualise a material-topic section

Real use case: CDL decarbonisation topic

Situation

Turn controlled data into a balanced GRI 3-3 topic section and decision-useful chart. The learner works only from the cited public report and the controlled teaching dataset; company-specific numbers must not be invented.

Evidence provided

Topic fiche, KPI table, claim register and chart template

Discussion and analysis tasks

1. State the impact and affected stakeholders.

2. Describe policy, actions and due-diligence process.

3. Compare result to baseline and target.

4. Select line, bar, waterfall or table based on the question.

5. Draft balanced narrative for progress, shortfall and corrective action.

Deliverable and acceptance

Two-page topic section with editable chart and evidence links

Chart reconciles to the table; narrative reports both achievement and material shortfall.
